Overview
Discover the basic theories, principles, laws of behavior, and scientific methods used in psychological research through this Bachelor of Science that takes a unique approach to psychology.

Our online psychology bachelor’s degree features an innovative and well-rounded curriculum that carries a strong science and liberal arts influence and will help you develop a number of important skills required in a broad range of occupations. Skills such as written and oral communication, cooperation, and analytical and critical thinking, combined with a strong background in the sciences and liberal arts demonstrates versatility, giving you the ability to pursue a variety of career paths.

Lecture and lab pairings will give you the opportunity to apply the scientific components you’ll learn firsthand, so that upon completion of the program, you’re able to demonstrate knowledge of psychological principles and concepts across several basic psychological content areas.

This online psychology degree can lead to upward career mobility or serve as a jumping off point for moving on to a master’s program which is required for professional careers in psychology. This degree will be seen as valuable by not only psychology-based employers, but more importantly, those across industries.

Minimum Admission Requirements

- Previous college credit must be transferred into the program, and minimum credits required can vary depending on previous coursework completed. Although this program works particularly well for students who have completed an associate’s degree with an emphasis in psychology, it is not required for admittance into this program.
- 2.0 cumulative GPA (2.5 cumulative GPA preferred) from all coursework previously completed
- Satisfy admission requirement in mathematics
- High school graduation or equivalent

Completion Requirements

- A minimum of 120 credits
- 42 upper-division credits (300 to 400-level), at least 30 of which must be earned at Colorado State University
- The number of courses you need to complete your degree depends primarily on how many previous credits transfer, which is determined prior to applying for admission
