- Tom Hickman

*"Several Osher classes have given me a clearer environmental understanding of the landscape that adorns our backyards. Rocks are no longer just rocks; colorful layers on the horizon are no longer just colorful layers on the horizon. They are the movements of the earth, they are an evolutionary progression, they are the geological layers of history, and they are central to Colorado's economy. How impressive is that! I look forward to other topics and expanded opportunities."*

- Loretta Stryharsky
