Overview

Learn critical tools and techniques to work in a dynamic project management environment and run projects on time and under budget with standard, worldwide-recognized processes. This 18-week certificate in project management program uses a comprehensive, integrated five-module curriculum based on the Project Management Body of Knowledge (PMBOK® Guide*). You’ll learn from instructors working in the industry as project managers who bring valuable real-world knowledge and instruction into the classroom.

Project management skills are in high demand. With our Project Management Certificate program, you are prepared to effectively execute projects and identify and manage project risk in virtually any field, including:

- Architecture
- Biotechnology
- Construction
- Engineering
- Finance
- Information Technology
- Manufacturing
- Government
- Pharmaceuticals
- Real estate development
- Service
- Manufacturing
- Government
- Pharmaceuticals
- Real estate development
- Service

Curriculum

The five-module program follows the guidelines from the Project Management Institute (PMI®), which also awards the designation for Project Management Professional (PMP®).

- **Module 1** – Introduction, Initiating, Process Groups, and WBS
- **Module 2** – Planning: Plan Schedule Management, and Plan Cost Management
- **Module 3** – Executing – Direct and Manage Project Work, Project Knowledge
- **Module 4** – Monitor and Control Project Work, Change Control, Risks
- **Module 5** – Close Project or Phase, and Next Steps

Program Project

Throughout the program, you will complete a project that integrates and applies lessons from each unit. By the time you finish, your resulting work is a portfolio piece that demonstrates your competency as a Project Manager.

PMI and PMP are registered marks of the Project Management Institute, Inc.
